Product Designer | UX Research & Design | Bridging Psychology + Technology

Human-centered designer combining behavioral research and technical systems thinking to craft scalable, accessible experiences

Education

New York University

New York, NY

Bachelor of Arts in Computer Science and Psychology

Expected December 2025

Relevant Courses: Software Engineering, Algorithms, Computer System Organization, Statistics for The Behavioral Sciences

Experience

NYU Landy Laboratory for Vision and Action

New York, NY

Undergraduate Research Assistant

May 2025 - Sep 2025

- Designed and built a VR reaching-under-risk platform in Unity (C#) to study motor decisions and spatial uncertainty in 3D space
- Collaborated with researchers to iterate interface timing, cue design, and usability; introduced standardized protocols and instrumentation, improving experimental reliability, participant comfort, and data quality across repeated sessions

Miss Poppins

Atlanta, GA

Product Designer

Jun 2024 - Sep 2024

- Led cross-platform redesigns for the coach dashboard, user mobile app, and marketing website, creating a cohesive multi-platform product ecosystem that streamlined interactions, aligned visual identity, and improved user experience consistency
- Drove end-to-end user research and prototyping by conducting 7 interviews and affinity mapping to identify key friction points, redefining user flows and translating insights into high-fidelity prototypes that **improved retention by 22%**
- Collaborated with PMs and engineers to **launch the MVP within 8 weeks**, establishing a scalable design system and feedback workflow that **reduced iteration time by 50%**

Scale AI

New York, NY

Quality Team Lead

Jan 2024 - Apr 2024

- Partnered with Google's Language Delivery Team to optimize AI annotation workflows and contributor UX through iterative testing and feedback analysis, refining task flows to improve annotation accuracy and operational efficiency across pipelines
- Built a structured onboarding-assessment system **reducing contractor training time by 25%** and **error rates by 12%**
- Analyzed contributor performance data to identify workflow friction and optimize task interfaces, **raising task accuracy by 15%**

Projects

Machine Learning American Sign Language Detector

- Developed an accessible web interface that recognizes ASL alphabet gestures and converts them into text in real time
- Implemented and refined the frontend using **HTML**, **CSS**, and **JavaScript**, creating a clean, intuitive, and accessible interface with clear feedback cues that improve gesture recognition flow and overall user experience for hearing-impaired users

Extracurriculars

Project Crescendo

New York, NY

UX Design Chair & Social Media Coordinator

May 2022 - Present

- Maintain the organization's website to streamline internal communication by centralizing information and updates for members
- Direct digital branding and UX content strategy that **grew followers by 34%** and **member sign-ups by 63%**
- Lead and organize interactive music sessions for students with disabilities in collaboration with KEEN (Kids Enjoy Exercise Now)

Skills

Programming: Python, Java, TypeScript, JavaScript, HTML, CSS, React, R, MATLAB, TensorFlow, OpenCV, C#

Software: Figma, Adobe XD, Indesign, Canva, Adobe Photoshop Fix/Mix, Microsoft Office Suite, Google Workspace

Certificates: Google UX Design Professional

Languages: Fluent in English and Korean
